VueData Technologies, Bengaluru — Software Engineer Trainee

OCTOBER 2021 - NOVEMBER 2021

- Acquired proficiency in front-end technologies such as ReactJS and NextJS, as well as back-end technologies including NodeJS.
- Collaborated with the development team, actively participating in the design and implementation of software solutions.

PROJECTS

Dynamic CMS Project

- Played a pivotal role in creating a dynamic Content Management System (CMS) for the Limitless project.
- Empowered administrators to efficiently add, edit, and manage data, optimizing data presentation within the app.
- Designed and implemented a dedicated Partner Dashboard offering detailed analytics.
- Provided stakeholders with crucial insights, including total users, platform distribution, and comprehensive activity metrics.
- Actively contributed to the seamless integration of new features into the existing Limitless project architecture.

Fitness Platform Enhancement

- Led the migration of the codebase from React.js to Next.js, achieving a remarkable 30% improvement in performance and SEO optimization.
- Spearheaded the design and implementation of visually captivating UI enhancements, resulting in a 20% increase in user engagement.
- Worked seamlessly with the team to smoothly integrate 10 new features into the upgraded Next.js platform.

Video Streaming Paltform

- Created new UI components based on client requirements, enhancing the visual appeal and user interaction.
- Developed backend functionalities in Node.js, including the creation of APIs to support various features.
- Actively collaborated with the team, contributing to the project's overall development and successful delivery.

Recruitment Tracking System

- Developed a responsive web application using Node.js and React based on internal team's requirements.
- Implemented role-based access control and other features to meet the project specifications.
- Successfully delivered a fully functional project that is currently being used by our company.
